

SIEMPRE (ALWAYS)

Book One

Siempre (Always), not your run-of-the-mill neck-biter, received 5 star reviews in the Readers' Favorite Book Reviews and Awards Contest. It integrates romance, adventure and flashes of sensuously explicit situations with multicultural characters, charismatic heroines and despicable antagonists in a believable world where vampires secretly, for the most part, co-exist with humans. The foundation of the story in Book One is a centuries-old friendship between Alina (Latina) and Layla (Persian) after which Alina meets the love of her long life.

Unrequited love drives Luther, an ancient vampiric, to chase Alina through time after he forcibly turns her. As she matures, she becomes an accomplished scientist who makes an epic discovery that could change the course of existence between vampirics and mankind. Alina also meets and falls in love with Sam, a human, who soon finds out she is much, much older than her youthful looks. When their forbidden love blossoms, Luther's jealous vindictiveness rages out of control, putting Alina, her friends, and Sam's family in grave danger.

Contest reader comments include the following:

"I want more, more, more. Alina and Sam may share a story that has been told a hundred times in the genre, but they are so well written that it's easy to root for them." "A pleasant surprise...a paranormal romance with a very strong female protagonist who isn't crude, masculine, or a female desperately wanting to be dominated." "Alina...a deep character with a brain and she likes to use it...a great book with a fantastic flow and anyone who wants a unique vampire story to read, this is your book."
